Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2 and 7-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Crum et al. Applicant's arguments have been considered but are not deemed persuasive. Applicant argues that the layer of adhesive 44 in the reference is not a "layer" because it does not cover an entire surface of the magnetic material 59, and that the adhesive layer in the reference is not on the "lower surface" of the magnetic material. The term "layer" is defined as "a single thickness, coat, ... or stratum"; see attached definition. The reference discloses the adhesive 44 as being a "coating" and the Figures show it as a single thickness stratum. Therefore, the reference's structure meets the instant claim limitations regarding the adhesive. Concerning the coating of the adhesive on a "lower" surface, the term "lower" surface is a relative term depending on the position from which the laminate is viewed and, therefore, does not structurally distinguish over the prior art article. With respect to the ability to fold the claimed laminate, the instant claims, including claim 7, are not directed to a folded laminate.

Art Unit: 1772

They are directed to a laminate that has the ability to be folded. Since the reference's article has the ability to be folded, it meets the instant claim limitations regarding folding.

Allowable Subject Matter

3. Claims 3-6 and 11-20 are allowed.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
